PROFESSIONAL SUMMARY

Full Stack Developer with **3+ years** of experience in building scalable and responsive web applications using **React.js**, **Node.js**, **Express.js** and **MongoDB**. Experienced in frontend development, REST API integration, authentication systems, payment gateway integration and cloud deployments. Passionate about creating high-performance and user-centric web applications.

TECHNICAL SKILLS

- **Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Design
- **State Management:** Redux Toolkit, Zustand, Context API
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication
- **Database:** MongoDB, Mongoose
- **Cloud & Deployment:** Cloudinary, MongoDB Atlas, Vercel, Render
- **Payments & Email:** Razorpay, Nodemailer, SMTP Integration
- **Tools:** Git, GitHub, Postman, VS Code, Vite
- **Core Concepts:** Authentication, Authorization, Role Based Access Control, API Integration, Performance Optimization, Lazy Loading, Code Splitting, Reusable Components

PROFESSIONAL EXPERIENCE

- **Frontend Developer** May 2023 – Present
Micro Spark Solutions
 - Developed scalable and responsive web applications using **React.js**, JavaScript and **Tailwind CSS**.
 - Worked on frontend and backend modules using **React.js**, **Node.js**, **Express.js** and **MongoDB**.
 - Integrated REST APIs, authentication systems and state management solutions using **Redux Toolkit** and **JWT**.
 - Improved application performance through lazy loading, reusable components and code optimization.

PROJECTS

- **Shoppe – Full Stack E-Commerce Platform** [View Live Site](#)
React.js, Redux Toolkit, Tailwind CSS, Node.js, Express.js, MongoDB, Cloudinary, Razorpay, JWT
 - Developed a production-ready full stack e-commerce platform supporting secure authentication, online payments, product management and order processing.
 - Implemented complete **JWT Authentication** and **Authorization System** including registration, login, logout, protected routes and role-based access control.
 - Built secure **OTP Verification** Workflow with email verification, resend OTP, forgot password, password reset and change password functionality.
 - Developed an **Admin Dashboard** to manage products, users and customer orders efficiently.
 - Implemented complete **Product Management System (CRUD)** including product creation, updates, deletion, category filtering and search functionality.
 - Integrated **Cloudinary** for cloud-based image upload, storage and media management.
 - Utilized **Redux Toolkit** for centralized state management across authentication, cart and checkout workflows.
 - Integrated **Razorpay Payment Gateway** for secure payment processing and order creation.
 - Built a complete **Order Management System** allowing users to view order history and administrators to update order statuses.
 - Designed and developed **RESTful APIs** using Node.js, Express.js and MongoDB following scalable backend architecture.
 - Implemented security measures including **bcrypt** password hashing, JWT authentication, protected middleware and rate limiting.
 - Optimized frontend performance through reusable components, lazy loading and efficient state management.
 - Deployed the frontend on **Vercel**, backend on **Render** and database on **MongoDB Atlas**.
- **Developer Portfolio** [View Live Site](#)
React.js, Tailwind CSS, JavaScript, Vite
 - Designed and developed a modern personal portfolio website to showcase professional experience, technical skills and projects.
 - Built a fully **responsive** user interface using React.js and Tailwind CSS, ensuring seamless experience across mobile, tablet and desktop devices.
 - Implemented reusable UI components, smooth navigation and optimized layouts to improve user engagement and accessibility.
 - Integrated project showcases, skill sections and professional information in a structured and visually appealing manner.
 - Optimized performance through component reusability, efficient rendering and responsive design practices.
 - Deployed the application on **Vercel** with continuous updates and live project demonstrations.
- **Recipe Search Application** [View Live Site](#)
React.js, JavaScript, REST APIs, Tailwind CSS
 - Developed a recipe discovery platform enabling users to search and explore recipes using real-time API data.
 - Integrated external **REST APIs** to fetch recipe details including ingredients, cooking instructions, images and categories.
 - Implemented dynamic search functionality with efficient state management to provide fast and responsive user interactions.
 - Built reusable React components and optimized API handling to improve maintainability and application scalability.
 - Designed a responsive and user-friendly interface ensuring accessibility across different devices and screen sizes.
 - Enhanced overall user experience through clean UI design and efficient data rendering techniques.

• **Live TV Streaming Application**

[View Live Site](#)

React.js, JavaScript, YouTube API, Tailwind CSS

- Developed a live TV streaming web application by integrating multiple **YouTube live streams** into a unified platform.
- Designed a responsive and user-friendly interface enabling seamless navigation across various live channels.
- Implemented category-based channel organization including News, Sports, Entertainment and Music for improved content discovery.
- Optimized video loading and rendering strategies to ensure smooth playback and enhanced user experience.
- Built reusable React components and managed application state efficiently for scalable frontend architecture.

EDUCATION

- | | |
|--|---------------------|
| • Bachelor of Technology | 2020 – Jul 2023 |
| <i>Deogiri Institute of Engineering and Management Studies</i> | CGPA: 8.28 |
| • Diploma in Mechatronics | Jun 2016 – Jun 2020 |
| <i>Indo German Tool Room, Aurangabad</i> | CGPA: 8.56 |

TECHNOLOGIES

React.js, JavaScript, Redux Toolkit, Tailwind CSS, Node.js, Express.js, MongoDB, REST APIs, JWT Authentication, Cloudinary, Razorpay, Git, GitHub, Vercel, Render, MongoDB Atlas, HTML5, CSS3, Zustand, Context API, Mongoose, Nodemailer, Postman, VS Code, Vite
